

# **REQUEST FOR PROPOSALS (RFP) – Community Outcomes Case Management System (COCMS)**

Issued by: North River Community Services (NRCS) – a fictitious nonprofit agency

Issue Date: April 17, 2026

RFP Number: NRCS-IT-26-0417

Proposal Due: 30 calendar days from issue date, 5:00 PM ET

Delivery Method: Email (PDF) and secure upload link provided upon registration

CONFIDENTIALITY NOTICE (Fictitious): This sample document is for training and template purposes only.

# 1. Executive Summary

North River Community Services (NRCS) seeks proposals for a cloud-based Community Outcomes Case Management System (COCMS).

The selected solution will support intake, scheduling, case notes, document management, outcomes tracking, and reporting across multiple programs.

NRCS intends to procure software licensing/subscription, implementation services, data migration, training, and ongoing support in a single award.

This RFP is a fictitious example intended to serve as a reusable template for software procurement activities.

# 2. Organizational Background

NRCS is a mid-sized nonprofit providing behavioral health and social support services across three counties. NRCS operates outpatient counseling, mentoring, workforce readiness, and community referral programs.

NRCS currently uses spreadsheets, email, and a legacy on-premises database to manage referrals and outcomes. This fragmentation increases administrative burden and reduces data quality.

NRCS seeks a modern platform that improves clinician efficiency, strengthens data integrity, and supports grant reporting and quality improvement.

# 3. Procurement Schedule

The schedule below is subject to change at NRCS's sole discretion.

| Milestone                    | Date / Window |
|------------------------------|---------------|
| RFP Released                 | Day 0         |
| Vendor Registration Deadline | Day 7         |
| Questions Due                | Day 10        |
| Answers Posted               | Day 14        |
| Proposals Due                | Day 30        |
| Shortlist Notified           | Day 40        |
| Demos/Interviews             | Day 45–55     |
| Intent to Award              | Day 60        |
| Contract Execution           | Day 75        |

## 4. Project Goals & Scope

NRCS's objectives for COCMS include:

- Standardize intake and eligibility workflows across programs.
- Enable secure, role-based case notes with configurable templates.
- Track outcomes, milestones, and assessments over time.
- Provide dashboards and grant-ready reports with export options.
- Integrate with Microsoft 365 for identity and collaboration.

In-scope components include: software subscription, configuration, data migration (legacy extracts + spreadsheets), training, and 12 months of support.

Out-of-scope (for this procurement): managed devices, network upgrades, and custom hardware purchases.

## 5. Functional Requirements

Vendors shall describe how their solution satisfies the functional requirements below. Responses should reference Appendix A requirement IDs.

Core modules expected: Client/Household, Referrals, Scheduling, Case Notes, Documents, Outcomes, Reporting, Administration.

NRCS prefers configurable workflows over custom code. Where customization is required, vendors must clearly describe maintainability and upgrade impacts.

| Area                 | Selected Requirements (Examples)                                                        |
|----------------------|-----------------------------------------------------------------------------------------|
| Intake & Eligibility | Configurable intake forms; duplicate detection; eligibility rules; e-signature capture. |
| Case Notes           | Structured notes; templates; time stamps; approvals; version history.                   |
| Scheduling           | Multi-provider calendars; SMS/email reminders; group sessions; no-show tracking.        |
| Outcomes             | Assessments; goal plans; milestone tracking; scoring; longitudinal views.               |
| Reporting            | Ad-hoc builder; scheduled reports; CSV/Excel export; role-based dashboards.             |

## 6. Technical Requirements

Solution must be cloud-hosted in the United States with high availability.

Supported browsers: latest versions of Edge and Chrome.

APIs: REST-based APIs for core entities; webhook/event support preferred.

Identity: SSO via Microsoft Entra ID (Azure AD) using SAML/OIDC.

Data portability: ability to export all data in structured formats upon termination.

Accessibility: WCAG 2.1 AA alignment for end-user interfaces.

## 7. Security, Privacy & Compliance

NRCS handles sensitive client information and expects strong security controls.

Minimum expectations: encryption in transit and at rest, RBAC, audit logs, MFA support, least privilege administration.

Vendors should describe alignment with HIPAA concepts (where applicable), incident response SLAs, vulnerability management, and secure SDLC practices.

Provide a summary of certifications (e.g., SOC 2 Type II) if available and provide a sample security whitepaper.

## 8. Implementation Approach & Deliverables

Vendors shall propose an implementation plan with phases, activities, and deliverables.

NRCS expects a phased rollout: Pilot (Program A), Expand (Programs B/C), Stabilize.

Key deliverables include: project charter, configuration workbook, migration plan, training plan, go-live checklist, and post-go-live support plan.

Vendors must include a sample project plan with durations and resource roles.

## 9. Vendor Qualifications

Provide evidence of at least three similar implementations within the last five years.

Include references with contact information, scope, timeline, and outcomes.

Describe your support model, customer success approach, and product roadmap process.

Disclose subcontractors and offshore resources (if any) and their roles.

## 10. Pricing Instructions

Provide a complete pricing proposal using the structure below:

- Software subscription: named users, concurrent users, and/or tiered licensing.
- One-time implementation: discovery, configuration, migration, training.
- Optional services: integrations, advanced reporting, additional environments.
- Ongoing support: standard vs premium, response times, after-hours support.

Include a 3-year total cost of ownership (TCO) summary.

## 11. Evaluation Criteria

NRCS intends to evaluate proposals using weighted criteria:

- Functional fit (30%)
- Technical fit & security (20%)
- Implementation approach (20%)
- Vendor experience & references (15%)

- Price & value (15%)

NRCS may invite finalists for demos and reference checks.

## **12. Proposal Submission Requirements**

Submit one PDF not to exceed 60 pages (excluding appendices), plus spreadsheets for pricing and requirements matrix.

Your response must include: executive summary, solution description, requirement responses, implementation plan, project team, pricing, and required forms.

Use the file naming convention: NRCS-IT-26-0417\_[VendorName]\_Proposal.pdf

Questions must be submitted via email; verbal questions will not be answered.

## **13. Contract Terms (Summary)**

NRCS anticipates a 3-year agreement with annual renewals.

Key terms include: data ownership by NRCS, confidentiality, insurance, limitation of liability, and termination for convenience.

Vendors may propose exceptions; however, exceptions will be evaluated and may reduce score.

## Appendix A: Requirements Matrix (Excerpt)

Vendors should respond with: Fully Meets / Partially Meets / Does Not Meet / Planned, plus notes.

| Req ID | Requirement                                                                              | Vendor Response                  |
|--------|------------------------------------------------------------------------------------------|----------------------------------|
| FR-037 | Provide capability for requirement 37: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-038 | Provide capability for requirement 38: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-039 | Provide capability for requirement 39: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-040 | Provide capability for requirement 40: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-041 | Provide capability for requirement 41: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-042 | Provide capability for requirement 42: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-043 | Provide capability for requirement 43: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-044 | Provide capability for requirement 44: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-045 | Provide capability for requirement 45: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-046 | Provide capability for requirement 46: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-047 | Provide capability for requirement 47: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-048 | Provide capability for requirement 48: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-049 | Provide capability for requirement 49: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-050 | Provide capability for requirement 50: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-051 | Provide capability for requirement 51: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-052 | Provide capability for requirement 52: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-053 | Provide capability for requirement 53: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-054 | Provide capability for requirement 54: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-055 | Provide capability for requirement 55: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-056 | Provide capability for requirement 56: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-057 | Provide capability for requirement 57: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-058 | Provide capability for requirement 58: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-059 | Provide capability for requirement 59: configurable workflow step, validation rules, and | availability for complete dates. |
| FR-060 | Provide capability for requirement 60: configurable workflow step, validation rules, and | availability for complete dates. |

## **Appendix B: Sample Statement of Work (SOW) – Outline**

B.1 Project Governance: Steering committee cadence, decision rights, escalation path.

B.2 Discovery: current-state mapping, future-state design workshops.

B.3 Configuration: forms, workflows, roles, templates.

B.4 Migration: extract-transform-load, validation, reconciliation.

B.5 Training: role-based training, train-the-trainer, job aids.

B.6 Go-live: cutover plan, hypercare, issue triage.

B.7 Acceptance: criteria, sign-off process.

B.8 Support: SLAs, release management, quarterly business reviews.

# Appendix C: Forms & Certifications (Fictitious)

C.1 Vendor Contact Form

C.2 Non-Collusion Certification

C.3 Insurance Attestation

C.4 Subcontractor Disclosure

C.5 Pricing Workbook Checklist

C.6 Security Questionnaire (Summary)

## Security Questionnaire (Sample Items)

SQ-01: Describe your control for item 1 (e.g., MFA enforcement, key management, logging, incident response).

SQ-02: Describe your control for item 2 (e.g., MFA enforcement, key management, logging, incident response).

SQ-03: Describe your control for item 3 (e.g., MFA enforcement, key management, logging, incident response).

SQ-04: Describe your control for item 4 (e.g., MFA enforcement, key management, logging, incident response).

SQ-05: Describe your control for item 5 (e.g., MFA enforcement, key management, logging, incident response).

SQ-06: Describe your control for item 6 (e.g., MFA enforcement, key management, logging, incident response).

SQ-07: Describe your control for item 7 (e.g., MFA enforcement, key management, logging, incident response).

SQ-08: Describe your control for item 8 (e.g., MFA enforcement, key management, logging, incident response).

SQ-09: Describe your control for item 9 (e.g., MFA enforcement, key management, logging, incident response).

SQ-10: Describe your control for item 10 (e.g., MFA enforcement, key management, logging, incident response).

SQ-11: Describe your control for item 11 (e.g., MFA enforcement, key management, logging, incident response).

SQ-12: Describe your control for item 12 (e.g., MFA enforcement, key management, logging, incident response).

SQ-13: Describe your control for item 13 (e.g., MFA enforcement, key management, logging, incident response).

SQ-14: Describe your control for item 14 (e.g., MFA enforcement, key management, logging, incident response).

SQ-15: Describe your control for item 15 (e.g., MFA enforcement, key management, logging, incident response).

SQ-16: Describe your control for item 16 (e.g., MFA enforcement, key management, logging, incident response).

SQ-17: Describe your control for item 17 (e.g., MFA enforcement, key management, logging, incident response).

SQ-18: Describe your control for item 18 (e.g., MFA enforcement, key management, logging, incident response).

SQ-19: Describe your control for item 19 (e.g., MFA enforcement, key management, logging, incident response).

SQ-20: Describe your control for item 20 (e.g., MFA enforcement, key management, logging, incident response).

SQ-21: Describe your control for item 21 (e.g., MFA enforcement, key management, logging, incident response).

SQ-22: Describe your control for item 22 (e.g., MFA enforcement, key management, logging, incident response).

SQ-23: Describe your control for item 23 (e.g., MFA enforcement, key management, logging, incident response).

SQ-24: Describe your control for item 24 (e.g., MFA enforcement, key management, logging, incident response).

SQ-25: Describe your control for item 25 (e.g., MFA enforcement, key management, logging, incident response).
